

Adding Images to Your Blog

Inserting an Image into a Blog that Doesn't Do Image Hosting

1. Prepare your image by using Paint.Net.
2. Open Firefox or IE and log into your blog.
3. Write your article or copy and paste it from a word processing document.
4. Open a second browser window and go to

<http://imageshack.us/>

5. Use the '**Browse**' button to find your graphic, double click on the image, tick the box marked '**remove size/resolution bar from thumbnail?**' and press '**Host It**'.

6. Copy the line of code **3rd from the bottom (Hotlink for Websites)** into your blog article.

7. Request publishing for your article.

Note for teachers – When approving articles you need to copy from **http://** to **.jpeg** into another browser window to preview the image.
